

Sage Jordan

Full Stack Engineer

Efficient and growth oriented problem solver. I am constantly challenging myself to learn and take ownership. I care about frequent and concise commits, take pride in my documentation, and am not afraid to ask for help.

LinkedIn & GitHub: sage-jordan

Technical Skills

Languages: JavaScript, PHP, Python, HTML, CSS

Libraries: Reactjs, Nodejs, Redux, JQuery, Axios, SCSS, LESS

Databases: MySQL, PostgreSQL, Redis, MongoDB

Version Control: GitHub, BitBucket

Other Tools: Trello, Jira, Notion, Kafka, DataDog

Education

Full Stack Web Development

Lambda School is a 9+ month Computer Science & Software Engineering Academy that provides an immersive hands-on curriculum.
Aug. 2019 - Aug. 2020

- ★ Approached coding challenges using pair programming
- ★ Utilized agile software development and Git workflow on all module projects and sprint challenges
- ★ Gained hands-on experience with client and server hosting, routing, and testing
- ★ Designed original user experiences across a range of web and mobile platforms, from ideation, to wireframing, to final production

Skills

- ★ Agile Methodology
- ★ Remote work
- ★ SCRUM
- ★ Project Management
- ★ Conflict Resolution
- ★ End-to-end testing
- ★ Responsive design
- ★ Documentation & Reporting

Experience

Software Engineer II at Sharpen
Aug. 2020 - Sept. 2021

- ★ Developed both independently and collaboratively with a remote, agile team to debug, create, and test code for the CaaS platform
- ★ Program with a user-first mentality
- ★ Create NodeJS microservices from the PHP codebase
- ★ Learned the basics of DevOps (continuous integration techniques), AWS, and SRE (site reliability engineer) responsibilities

Team Lead at Lambda School
Nov. 2019 - Aug. 2020

- ★ Led a team of 9 students that emulates a real work environment using Agile methodology
- ★ Reviewed student code to provide daily feedback and one-on-one code reviews
- ★ Troubleshooting of web curriculum through slack help channel or code review
- ★ Progressively delivered supplemental lectures on various topics related to software engineering

Projects

- ★ Collaborated with a team of 7 in **Lambda Labs**, a 16-week project developed with a **ReactJS** front-end, **NodeJS/Express** server, and **PostgreSQL/Knex** database. We utilized **Notion** to organize our Product Vision Document, and **Trello** to manage our daily and weekly goals.
